

# Press Release

## PocketiNet Broadband Internet Service now available in Yakima

Yakima, WA April 2, 2010: PocketiNet Communications, a leading provider of high speed fixed wireless broadband services, has successfully deployed service to the community of Yakima, Union Gap, Moxee and surrounding areas. The three new tower sites will provide coverage that will allow previously underserved residents and businesses in the rural and surrounding communities of Yakima access to reliable, high speed Internet access.

"I'm excited for our company as we branch out into this new market. I think we have a state of the art network in the area that should provide a very high quality service to our customers there" stated Todd Brandenburg, President of PocketiNet Communications Inc. "Of course, in addition to our network, it's really our employees that provide the "*special sauce*" that makes us unique and better than the rest!"

PocketiNet is a locally owned and operated broadband Internet service provider. Founded in April of 2000, PocketiNet serves the Mid-Columbia Basin from Walla Walla to Yakima, WA and south to Umatilla, OR and all points in between. In the competitive market of broadband Internet service providers, PocketiNet has positioned itself above the competition by actually delivering on its promises: speed, reliability, value, dedication and customer care.
